

Mill City Environmental Receives 2013 EBJ Business Achievement Award for USS Cassin Young Remediation Project ***Environmental Business Journal Recognizes Firms for Growth and Innovation***

San Diego, Calif. (February 5, 2014)—Environmental Business Journal® (EBJ), a business research publication which provides high value strategic business intelligence to the environmental industry*, has honored 41 companies for revenue growth, acquisitions, innovative project designs, technology applications, new practice areas, social contributions and industry leadership in 2013.

Mill City Environmental Corporation (MCE) is pleased to announce that it was chosen to receive the EBJ award in the category of Project Merit: Remediation. “We are honored to receive this prestigious award from EBJ, and even more proud of our team and the remediation work that they completed on the USS Cassin Young,” said Brian Chapman, president, Mill City Environmental Corporation.

Specifically, MCE was recognized for its work in a time sensitive multi-task remediation/restoration project on board (leaning up and restoring) the USS Cassin Young, a former World War II destroyer that now serves as a museum at the Charlestown Navy Yard, Boston, MA. MCE was awarded a contract with the National Park Service (NPS) to perform asbestos abatement, pipe insulation repair, decon engine room bilge areas, and clean and gas free 18 fuel tanks on the historic Navy vessel.

“In what is widely regarded as a stable market, a number of companies exceeded the norms of low single-digit growth with double-digit growth or ambitious ventures into new practice areas or technology development,” said Grant Ferrier, president of Environmental Business International Inc. (EBI, San Diego), publisher of Environmental Business Journal.
